August 6, 2025

In the **book website** <https://www.cambridge.org/hsieh-ieds>, under the *Resources* link, one can download the datasets needed for some of the exercises in the book. Unfortunately, a **README.pdf** file was missing, rendering it difficult to locate the precise dataset for a particular exercise. If you are missing the README file, please click the link for downloading data for the exercises (and discard any previous version of the “Data for Exercises” folder).

## Chapter 15

p. 496, line 3 after Eq.(15.1): “The hyperbolic tangent function has gradients in the range  $(1, 1)$ ” should be replaced by “The hyperbolic tangent function has gradients in the range  $(0, 1]$ ”.
